Three claims and what survived review

the claim	what two independent referees left of it
C1 our seven errors share a shape	survives, restricted: TWO shapes, not one (the one-sentence check catches 3 of 7)
C2 the designs can only imitate	restricted twice: to what we ran, and to specification vs selection (034 refutes the wide form)
C3 the graph cannot reach a new ontology	withdrawn to a statement of ignorance, with an operational test added
